

I live in San Jose, California. I have been listening to K-Love everyday for years now. The station is a beacon of hope and love and calmness in a sea of hate. The ride to work would certainly be a very lonely one without the comfort and peace that K-Love offers. If it were to be displaced by an LPFM broadcaster providing other programing I would not listen to that station. K-Love is part of my life. They give me the tools to face the drive to work as well as problems that I have encountered. It is in the public interest to provide such programing to the public. Children can hear songs about love and not hate. Songs were family is nurtured and each life as a meaning.
